

## IMPORTANT NOTICE

Liberty has filed tariff sheets with the Missouri Public Service Commission (PSC) that would increase the company's natural gas service revenues by approximately \$7.5 million, of which approximately \$0.5 million is already being recovered through its Infrastructure System Replacement Surcharge (ISRS), resulting in a net increase of approximately \$7 million. In its filing before the PSC, Liberty has stated that the rate increase is necessary generally to offset or reflect increases in operating costs, the construction of significant new gas service facilities, as well as return requirements on rate base. The overall request would raise a typical residential customer's bill by approximately 14.8 percent. Liberty proposes to consolidate its three existing rate districts into a single district with a uniform charge for delivery. For Liberty's existing Northeast Missouri district the overall request would result in an increase of approximately \$2.06 per month. For Liberty's existing Southeast Missouri district the overall request would result in an increase of approximately \$14.09 per month. For Liberty's existing Western Missouri district, the overall request would result in an increase of approximately \$7.62 per month. The rate increase request, which is subject to regulatory approval, would take effect no later than August 26, 2018.
